Key Success Outcomes by Super Cluster, Academic Partnership, and C4E Participation

The following tables display Key student success outcomes by participation in super clusters, academic college partnerships, and C4E. Results are provided by cohort term for Key students in the FA16-FA19 FTFT cohorts.

Table 9 provides an overview of first fall academic indicators and second fall persistence and GPA among Key students.

Table 9. Key Success Outcomes (FA16-FA19 FTFT Cohorts)

Total	2393	15.0%	2.84	35.4%	84.2%	2.95

The number of students in the Key Communities increased by 31% between FA16 and FA19. The proportion of students on academic probation during their first fall peaked in FA17 (16.7%), decreasing by about 1 PP in subsequent cohorts. First fall cumulative GPA increased by .03-.04 grade points for each cohort since FA17. About 35% of Key students completed 30 credits by the end of their first spring, and persisted to second fall at about 84%. Second fall cumulative GPA increased among the FA19 cohort to 3.12 from about 2.90 in previous years. This increase is likely influenced by the COVID-19 S/U grade policy.

Table 10 displays success metrics by super cluster and course credit, as well as instructor.

Students who are part of a super cluster overall have a slightly lower average first fall academic probation rate, a higher first fall GPA, and a higher first spring 30 credit completion rate compared to Key students who did not participate. Second fall persistence and cumulative GPA differ minimally by super cluster status. Within the super cluster group, students in the 1 credit super clusters have more favorable outcomes across all indicators compared to the 3 credit 192C course average. Outcomes are also broken out by individual instructor.

Table 11 displays success metrics by college partnership status and course credit.

Overall, Key students in courses with a college partnership have stronger success outcomes compared to non-partnership Key students. Among FA19 sections (Engineering and Agricultural Sciences), students enrolled in the Engineering course earned a higher first and second fall GPA by about half a grade point, completed 30 credits at a higher rate (15 PP) by the end of their first spring, and persisted to second fall at a 14 PP higher rate.

Table 12 displays success outcomes by C4E status.

Overall, Key C4E students persisted to second fall at a similar rate compared to Key students who did not participate in C4E. However, all other outcomes (first fall probation, first fall GPA, 30 credit completion, second fall GPA) are lower, in comparison.

Table 13 displays probation rates by Key status and cohort term.

Students who participated in Key 192C have similar success outcomes compared to Key 192B. Among the FA19 cohort, Key 192C students have stronger first year outcomes; first fall probation is 7 PP lower, first fall GPA is .20 grade points higher, and their 30 credit completion rate is 21 PP higher. Second fall persistence and GPA are similar.
