

# Rams Against Hunger Year-end Report

Operating from The Office of Student Leadership, Involvement and Community Engagement (SLiCE), Rams Against Hunger (RAH) offers a menu of services that support students, faculty and staff experiencing food insecurity. This report explores three programs specifically: the Ram Food Recovery Program (FRP) the Meal Swipe Program, and the Mobile Food Pantry<sup>1</sup> (MFP).

The MFP is a monthly event that provides up to 20 pounds of food to eligible students (based on income requirements set by the Food Bank of Larimer County). This report describes the visitors to the Mobile Food Pantry (MFP) for the past three academic years, September 2017-August 2018 (AY18), September 2018-August 2019 (AY19), and September 2019-August 2020 (AY20).

The FRP is an SMS-based alert system that makes leftover food from Housing & Dining Services catered events available for pick up. This report describes the participants enrolled in the FRP for the past two academic years, AY19 and AY20.

The Meal Swipe program provides 75 dining hall meals each semester to students with financial need. This report describes the applicants and enrollees of the Meal swipe program for AY20.

## Highlights

Most program participants are undergraduate students, yet employees, typically graduate assistants and state classified personnel, also make up a substantial proportion of participants. Long term trends show an increase in users of RAH's programs and as the COVID-19 pandemic continues, it is likely RAH will see an increase in the demand for and use of its services.

### Mobile Food Pantry

- Overall, AY20 visits to the MFP were similar to those during AY19, though the number of unique visitors increased slightly from 2,810 to 3,086.
- Visitation tends to be higher in the fall (September through November).
- MFP visitors attend about two monthly pantries each year and about one-quarter of visitors have attended pantries in multiple years.
- Each MFP in AY20 averaged about 440 returning visitors and 190 new, first-time visitors. Compared to AY19, the MFPs in AY20 attracted a higher proportion of new, first-time visitors on average.
- About 9 in 10 food pantry participants were identified as ever having been students and they were more likely to be racially minoritized, first generation, or Pell grant recipients than the overall student population at CSU. (Note that first generation and Pell status is only available for undergraduate students).
- Graduate Masters or Ph.D. students averaged about 4 visits to the MFP between October 2017 and July 2020 while undergraduates averaged less than three for the same period.
- Of all employees using the MFP, almost 70% were student hourly. The number of non-student employees visiting the MFP in AY20 was more than twice the number seen in AY19.
- The median income of salaried employees using the MFP was about \$37,000, which is about \$3,000 more than the limit set by the Food Bank of Larimer County for a two-person household to qualify for its Fresh Food Share pantry program.

---

<sup>1</sup> Note that beginning in April 2020, (as COVID arrived in the region) the MFP morphed to a full time "LSC Theatre Pantry", for the remainder of the reporting period.

- LSC Theatre Pantry, operating multiple days per week starting April 23 in response to the COVID-19 pandemic, served 3,135 people over the course of 46 days. The Theatre Pantry averaged about 70 visitors per day.
- Students comprised about 80% of visitors to the Theater Pantry, averaging about two visits per month. Overall, as the pandemic drew on, the average number of visits per month increased.

### Food Recovery Program

- Overall, participation in the FRP more than doubled between February 2019 to March 2020, from 392 participants to 984.
- Typically, participants were alerted to between one and six events each month with higher than average events in May, June, and July 2019.
- Almost all FRP participants were students or student employees; about two-thirds were undergraduate students.
- About one in five employees enrolled in the program were graduate assistants and about one in ten were administrative professionals or state classified employees.

### Ram Meal Swipe Program

- Since FA15, over 1,500 students have applied for the meal swipe program.
- The average EFC for applicants has increased over time, perhaps indicating that food insecurity is becoming more prevalent among a larger, more well-off group students.
- Applicants often described their financial situations as having to prioritize their limited incomes, paying rent and bills first with food becoming a lower priority. Many reported having to skip meals as a result.
- During AY20, a total of 442 undergraduate students were enrolled in the Swipe program, 181 in FA19 and 301 in SP20.
- Students in FA19 used a over 10,000 meals total and about 56 of their 75 meals on average, compared to students in SP20 who used about 9,100 meals total and 30 on average. The reduction in meal usage in the spring is likely due to the dormitories closing during the COVID-10 pandemic.
- About 9 in 10 Swipe participants lived off campus and almost 7 in 10 enrollees were racially minoritized or first generation. The average EFC for Swipe participants was about 2,900, well below the program requirement of 10,000.

### Overall RAH Program Utilization

- In AY20, about three-quarters of students participated in only one RAH program, the majority of those in the Mobile Food Pantry (about 1,800 students). Only 3% of all students participated in all three RAH programs (about 100 students).
- For employees (excluding student hourly) during AY20, two-thirds participated in the MFP only, 14% in the FRP only, and 20% participated in both.

## Mobile Food Pantry

The Mobile Food Pantry is a monthly event that provides a 20- to 30-pound box of fresh, frozen, and shelf stable food items to eligible students. This section of the report describes the visitors to the Mobile Food Pantry (MFP) for the past three academic years, AY18, AY19, AY20. Note that the data for AY18 encompasses MFPs held between October 2017 and July 2019, AY19 includes MFPs held between September 2018 and July 2019, AY20 includes MFPs held between September 2019 and July 2020. In response to the COVID-19 pandemic, at the end of April 2020, RAH began operating a food pantry out of the LSC Theatre, which was open three to four days per week. For comparability purposes, if someone used the Theatre Pantry, they are counted only once for that month. Usage of the multiday Theatre Pantry is discussed separately.

### Mobile Food Pantry Visitation over Time

Between AY18 and AY20, the MFP attracted 19,400 visitors, though a significant number of these visitors attended multiple events (see Table 1). In AY20, a total of 3,086 unique visitors attended the MFP, averaging 2.2 visits each; AY19 saw 2,810 unique visitors averaging 2.5 visits each. Overall, the total number of visits to the AY20 MFP was similar to that of AY19; 6,874 total visits in AY20 compared to 6,953 in AY18.

Figure 1 displays month-by-month comparisons of the number of visitors to each MFP over the past three years. The MFPs held in October, December, and February of AY20 attracted significantly more visitors for the same months a year prior.

Figure 1: Monthly Food Pantry Visitor Compared by Year

Figure 2 displays the number of first-time (new) and returning visitors to each MFP. Returning visitors are anyone who attended at least one MFP in the past, whether it was the month prior or the year prior. New visitors are anyone visiting the MFP for the first time.

Figure 2: First-time and Returning Food Pantry Visitors Over Time

Spikes in new visitors to the MFPs can be seen at the start of each term, in September and January, with the incidence of new visitors declining over the subsequent months. A spike in new visitors to the MFP occurred in April 2020, likely in response to the COVID-19 pandemic. On average, about one-third of visitors each month in AY20 were new to the MFP, compared to about one-quarter of visitors in AY19.

### Student MFP Participants

- Overall, across all three years, more than 9 in 10 MFP visitors were students or student employees (see Table 2).
- Students using the MFP were more likely to be racially minoritized, first generation, or Pell grant recipients than the overall student population at CSU (see Table 3).
- About 75% of MFP participants were undergraduate students and about 20% were Masters or Ph.D. students (see Table 4).
- Graduate Masters or Ph.D. students averaged about 4 visits to the MFP between October 2017 and July 2020 while undergraduates averaged less than three for the same period (Table 9).

### Employee MFP Participants

- While the vast majority of MFP participants were students, about 6% of MFP visitors in AY20 were employees or associates, which was twice as many compared to AY19 (see Table 2).
- About half of these non-student employees using the MFP were female or were racially minoritized (see Table 3).
- Of all employees using the MFP in AY20, almost two-thirds were student hourly employees and about 17% were graduate assistants (Table 5). State classified and employees were the next most populous group to use the MFP in AY20, comprising about 11% of employee visitors. State classified employees' use of the MFP increased by almost 5 percentage points in AY20 compared to AY19.
- While less than 20 faculty used the MFP, they averaged about 3 visits over the past three years (see Table 8). Graduate assistants and state classified employees had the highest average visits at about 4.
- Salary information was available for about 1,000 employees. The median income of salaried employees was about \$37,000 in AY20, though salaries ranged between a low of about \$22,700 to a high of about \$84,000 (Table 7). Information regarding wages were not available for hourly employees.

### COVID-19 LSC Theatre Food Pantry

In response to the COVID-19 pandemic, RAH operated the food pantry out of the LSC Theatre multiple days per week starting April 23. During this period, the food pantry was open for 46 days and served 3,135 people (see Table 10). The pantry averaged about 70 visitors per day.

During the first few weeks of operation, Theatre Pantry usage was tracked via clickers; person-level data (via CSU ID) were captured starting May 8 (36 days of the pantry). During this period, 899 unique visitors used the pantry between May 8 and July 31; 317 (35%) were first-time users of the RAH food pantry. Half visited only once, about 20% visited twice, and 30% visited three or more times. While students (students only and student employees) made up the majority of visitors (about 80%), they averaged about 2 visits overall compared to employees or associates who averaged about four visits during this period (see Table 11). Overall, as the pandemic drew on, the average number of visits per month increased. For example, students averaged 1.4 visits to the pantry for the month of May. By July, the average monthly visits increased to 1.8. Similarly, employee or associates averaged 1.9 visits in May, 2.3 in June, and 2.8 in July.

LSC Theatre multi-day food pantry visitors

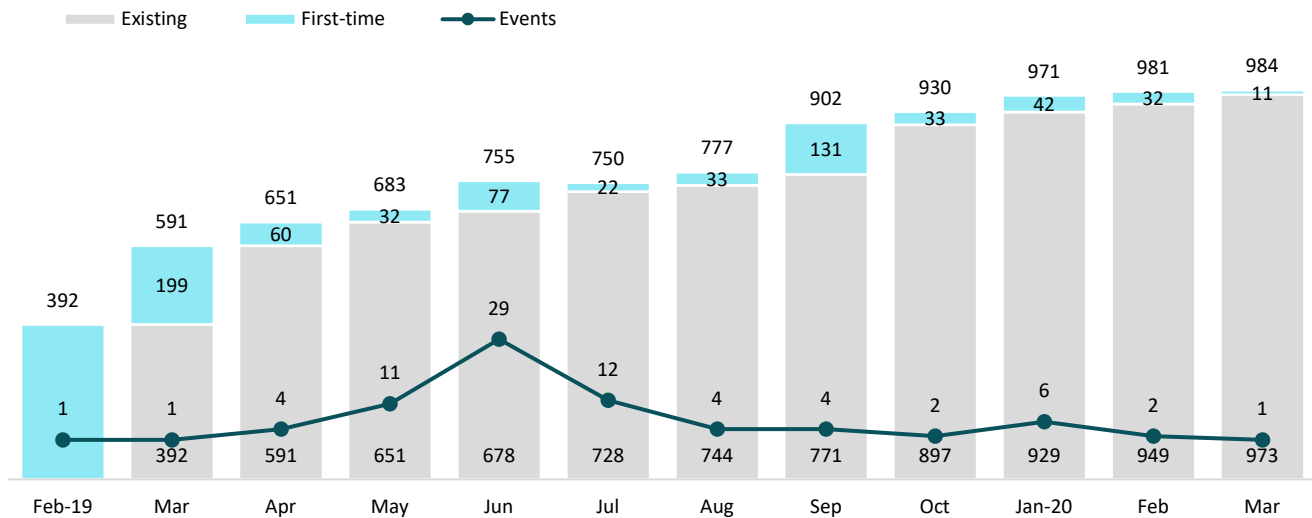

### Ram Food Recovery Program

The Ram Food Recovery Program (FRP) supports students, faculty, and staff experiencing food insecurity and reduces food waste by making the food left over from Housing & Dining Services catered events available for pick up. Participants sign up for the program with their cell phone number and when food becomes available, the program coordinator sends a text message (with the location and description of the food); participants have 30 minutes to pick up leftovers in clean containers. Participants may opt-out of the program at any time by sending a "STOP" message to the system.

This section of the report describes the participants enrolled in the FRP for the past two academic years, 2018-2019 (AY19) and 2019-2020 (AY20). Note that the data for AY19 includes FRP messages sent between February 2019 and August and AY20 includes messages sent between September 2019 and March 2020.

Figure 3 displays the new and existing FRP sign-ups by month as well as the number of events advertised each month to participants.

Figure 3: Food Recovery Participants and Events by Month

Overall, participation in the FRP more than doubled between February 2019 to March 2020, from 392 participants to 984. The FRP received a generally low number of new sign-ups each month (about 35-40 on average). However, between February and March 2019, almost 200 new people signed up for alerts. Another spike in signups occurred at the beginning of the FA20 term in September (130 new signups).

During AY19, the system alerted participants to 62 total events; data for AY20 is incomplete. Typically, participants were alerted to between one and six events each month. May and July 2019 had higher than average events at 11 and 12, respectively, and July 2019 had the highest number events at 29.

### Student FRP Participants

- Overall, almost all FRP participants (1,044 out of 1,064) were students or student employees (see Table 14).
- Students using the FRP were more likely to be racially minoritized, first generation, or Pell grant recipients than the overall student population at CSU (see Table 15).
- About two-thirds of FRP participants were undergraduate students and about 27% were Masters or Ph.D. students (see Table 16).
- Students received alerts for over 50 events on average for the entire reporting period (Table 21).

### Employee FRP Participants

- About three in five FRP participants were student hourly employees, about one in five were graduate assistants, and about one in ten were administrative professionals or state classified employees (see Table 17).
- Salary information was available for about 250 employees. The median income of salaried employees was about \$40,600 in AY20 and ranged between a low of \$29,200 to a high of \$185,000 (Table 19). Information regarding wages were not available for hourly employees.

## Ram Meal Swipe Program

The Ram Meal Swipe program provides 75 dining hall meals each semester to undergraduate students with financial need. To qualify for the program, undergraduates must not have a meal plan, be registered for at least 6 credits, have an Expected Family Contribution (EFC) of 10,000 or less based on the Free Application for Federal Student Aid (FAFSA) or CSU ASSET Bill Institutional Aid Application. Meals are loaded electronically onto the student's RamCard and can be used at any CSU dining hall. Unused meals expire at the end of the term and students may reapply each semester. This report describes the applicants over time and the enrollees of the Meal Swipe program during FA19 and SP20.

The Ram Meal Swipe Program is funded through donations from the CSU broader community. The majority of these funds come in during CSU's annual Day of Giving, with supplemental swipes being garnered directly from students themselves during the "RAH Student Day of Giving". Despite this generous effort from the CSU community, RAH is unable to serve the entire population of eligible students who have applied each semester. The number of students on the waitlist often tops 300 and students remain "in line" until the time funding is sufficient to serve them (typically a semester). Students who wish to re-apply may do so but RAH gives preference to students who have not been allocated swipes in the past.

### Applicants

Data for applications to the Meal Swipe program was available starting in FA15 (Table 22). Since then, over 1,500 students have applied for the program (though not all students who apply may be eligible for the program). The maximum EFC allowable for the program is 10,000; the average EFC for applicants has increased over time, perhaps indicating that food insecurity is becoming more prevalent among a larger, more well-off group students.

The application for the Swipe programs asks students to indicate any financial or food resources they use currently (collected for informational purposes only and does not impact whether a student will be accepted into the program; Table 23). Overall, over three-quarters of AY20 applicants utilized financial aid and about half had scholarships. Compared to previous years' applicants, applicants in AY20 reported higher usage of the Larimer County Food Bank/Food Share or a church pantry or other pantry. Across all years, SNAP, WIC, and soup kitchens were used by fewer than 1 in 10 applicants.

AY20 Applicants Financial and Food Resources

Applicants could also request more information on various financial or food support programs (Table 24). For all years, about two-thirds of applicants requested more information on scholarships; about half requested information on financial aid; and about one-third requested information on food nutrition, the Larimer County Food Bank/Food Share, and SNAP. More applicants in AY20 than in previous years requested information on WIC.

The application provides space for applicants to describe in their own words their current financial situation and how the Swipe program would help support their success at CSU. The quotes below are typical of many

applicants' financial situations. (Quotes are taken verbatim from submitted applications and have not been edited for spelling or grammar.)

Applicants describe prioritizing their limited incomes, paying rent, utilities, and bills first; food becomes a lower priority and some have to skip meals as a result.

*I do not receive financial help from any members of family. I work part time and have enough money to pay for rent, but often times not enough to buy food on a frequent basis.*

*Work two jobs and just don't make enough on top of bills to pay for food. Usually find myself picking between paying bills on time or buying groceries.*

*A broke college student who's looking to eat a little more throughout the day. I skip lunch or dinner on most days because I don't have the funds to eat both throughout the week.*

*I realized I'm choosing to eat less and less to offset the costs of living, and if there's a way to still get the nutrition and meet basic calorie needs than I really need to try.*

For many applicants, participation in the program would lessen their stress about food and allow them to focus on their studies. Some applicants mentioned how distracting being hungry can be and felt it negatively impacted their academics. Other applicants looked forward to having healthy food to eat instead fast or junk food.

*It would cause me to have one less worry about where my next meal is coming from*

*I will finally not be hungry in class. It's very challenging to go to class hungry and focus.*

*It would allow me to eat more healthy, I don't have time to cook food so I usually end up eating fast food which I have noticed doesn't give me the best energy throughout the day. The program would allow me to not stress as much about getting my nutrition good.*

*I would not need to skip meals every school day. I usually come to school hungry and leave hungry and I feel that it is affecting what I am focusing on in class.*

### Participants

A total of 442 students participated in the Swipe program in FA19 and SP20, though most had originally applied to the program prior to AY20 (Table 22). Figure 4 displays the sociodemographic characteristics of the 442 students who participated in the Swipe program in AY20. Data from this figure are based on data in Table 26.

Figure 4: Meal Swipe Participants AY20

Almost two-thirds of Swipe program participants were also student employees (Table 25). About 7 in 10 were full-time students and about 9 in 10 lived off campus (Table 26). About 7 in 10 of enrollees were racially minoritized or first generation. The average EFC for Swipe participants was about 2,900, well below the program requirements.

About 180 students swiped meals in FA19 compared to 300 in SP20 (Table 25), though more meals (total and average) were used in the fall than in the spring (Table 28). Students in FA19 used over 10,000 meals total and about 56 of their 75 meals on average, compared to students in SP20 who used about 9,100 meals total and 30 on average. The reduction in meal usage in the spring is likely due to the university moving to remote operations during the COVID-10 pandemic.

## Overall RAH Program Utilization

While previous sections of this report focused on individual programs, this section explores the extent to which members of the CSU community use a combination of programs to address their needs. Table 29 and Table 31 display the use of one or more programs by students and employees for AY20, respectively.

In AY20, about three-quarters of students participated in only one RAH program; the majority of those in the Mobile Food Pantry (about 1,800 students). Of the approximate one-quarter of students who participated in two or more programs, most students participated in the MFP and FRP (about 350 students). Only 3% of all students participated in all three RAH programs (about 100 students).

Seniors were the most likely undergraduates to use RAH programs. They comprised 44% of MFP only users, 72% of MFP & FRP users, and 72% of MFP, FRP, and Swipe users. MFP and FRP participants tended to be female, and, since the Swipe program has income requirements, had higher representation of Pell recipients than seen in the overall CSU population.

During AY20, two-thirds of employees (excluding student hourly) participated in the MFP only, 14% in the FRP only, and 20% participated in both. Graduate assistants comprised about three-quarters of the employees using both programs.

## Conclusions

RAH provides a necessary service to the CSU community. Undergraduates, graduate assistants, and state classified personnel are among the heaviest users of RAH's programs. Long term trends show an increase in users for the MFP and FRP month over month and the Swipe program often carries a waiting list. With the university shut down for the latter part of the spring term and the summer in response to the coronavirus pandemic, food insecure community members were unable to take advantage of the FRP. At the same time, RAH established the LSC Theatre Pantry, serving an average of 70 people each day. As the COVID-19 crisis persists and economic uncertainty remains, it is likely RAH will continue to see an increase in the need for its services across the community.

AY20 Student RAH Program Utilization

AY20 Employee RAH Program Utilization

## Appendix: Detailed Tables

### Mobile Food Panty Results by Year – Duplicated Visitors

The following tables display results by academic year. For users visiting MFPs in multiple years, their characteristics will be counted in each applicable year.

Table 1: Visits by Year

	AY18		AY19		AY20		Overall	
1	1,161	47.1%	1,334	47.5%	1,524	49.4%	4,019	48.1%
2	549	22.3%	515	18.3%	637	20.6%	1,701	20.3%
